

*“The first step in  
your child’s education”*

## Our Philosophy

At Little Miracles we believe that kindergarten is the first significant step in your child’s formal education, as this is a vital time for children to learn and develop. Our vision is for all children is to experience play-based learning that is engaging and builds success for life. We believe that kindergarten provides an important step in the transition from home to school.

Children are viewed as competent and capable individuals, who have diverse developmental levels, cultural beliefs and life experiences. Educators promote success for all children by embracing inclusive teaching practices, family diversity and valuing family’s involvement in their children’s learning.

We provide a child-centered and play-based curriculum where the children have the opportunity to make their own choices and decisions in learning. A child-centered curriculum takes into account the children’s strengths, current understandings, and interests. Play is child initiated and fun, therefore children are motivated to learn and develop a positive outlook on learning. Play enables children to draw on what they already know, and provides opportunities for teachers to scaffold their understanding of concepts such as literacy and numeracy.

Positive interactions and relationships support and encourage children’s social and emotional learning. At Little Miracles we aim to provide a safe and positive environment where children are supported in developing relationships with adults and peers. This promotes an environment where children feel comfortable, are encouraged to take risks, and can develop a positive self-identity.
